Delivering pure water with smart way

About Water ATM

Ultracare introduce world most convenient and economical concept to get fresh and pure drinking water specially those who can not afford to purchase pure water for drinking. It dispenses pure and safe drinking water 24/7 round the year. **People can purchase water on the "pay per use" as when they want.** It saves time; effort and money that people

spend on travelling or standing in queues to fetch safe drinking water. **People learn to use water prudently as they have to pay for it even it is nominal cost.** It reduce dependence of people on packaged drinking water, which otherwise is an expensive option, especially for those living in rural areas or below poverty line.

ULTRACARE
G R O U P

Cabinet Water ATM

Specification

Power	: AC-220V for I Phase / AC-415V for III Phase
Power Input	: 5 HP I / III / I Phase
Rated Current	: 15 Am
Pure water Production capacity	: 500 LPH
Pure water tank capacity	: 100 LTR
Pure water tank capacity - cold	: 100 LTR (Temp 12°C to 20°C)
Dispensing flow	: By Gravity
Raw Water Source	: Boar well, open well and Tap water
Online chiller	: 1Tr
Bottle filling size	: 300 ml glass/500 ml/1 ltr/2 ltr/5 ltr bottle
Water Treatment	: Pre-filtration + RO+UV

Features

- World best water purification technology with pre-filtration + RO + UV.
- Pure & Safe water 24 / 7 round the year.
- Most advance design for installation & to operate.
